MEMORANDUM FOR: Chief, Photo Intelligence Division 30 April 1956
Office of Research and Reports

SUBJECT : Request for 70 mm Duplicate Positive

REFERENCE : Memo for Project Director, AQUATONE, dated
23 April 1956, fm C/PI/RR (SAPC-4872)

1. I am referring your request to the Project Director of Operations for his comment.

2. My own provisional comment is that it will probably be impossible to prepare overseas a duplicate positive for each 70 mm film which can be forwarded directly to you. We expect to require each Detachment to prepare a dup positive or negative for use by its own photo-interpreters and to forward the original negative to Eastman Kodak where it will be required in connection with the processing of the 9 1/2 inch film. To ask the Detachments to make two dups would probably involve an excessive work-load.

3. What will be possible, however, is to ask Eastman to make a duplicate positive and forward it to Washington probably in advance of the other photography from the mission in question.
